PROFESSIONAL SUMMARY

Experienced Technical Operations & Application Support professional with over 7.6+ years of expertise in Telecom IT Infrastructure, SAP CRM systems, and mission-critical Production Support environments. Proven track record in Incident & Problem Management, SLA governance, system migrations, and enterprise application stability.

Hands-on expertise in SQL, Oracle databases, and Unix/Linux environments. Currently up skilling in Python, Machine Learning, Generative AI, and Intelligent Automation to transition into AI-driven Operations and Automation-focused roles.

CORE SOMPETENCIES

- Application & Production Support (L1/L2)
- Incident & Problem Management
- SLA & KPI Governance
- Root Cause Analysis
- SAP CRM Operations
- Telecom VAS & Charging Platforms
- Database Monitoring (Oracle 11g/19c)
- Unix/Linux Server Operations
- Change & Release Management
- Stakeholder & Vendor Coordination
- AI-Driven Automation (Upskilling Phase)

TECHNICAL SKILLS

- **Programming & Automation:**
  Python (AI & Automation – In Progress), SQL
- **AI & Emerging Technologies:**
  Machine Learning Fundamentals, Generative AI, Prompt Engineering
- **Enterprise Tools:**
  SAP CRM, SQL Developer, BMC Remedy, HPSM, Citrix, WinSCP, Putty
- **Databases:**
  Oracle 11g, Oracle 19c
- **Operating Systems:**
  Unix / Linux
- **AI Tools :**
  - ChatGPT, Google Gemini, Perplexity, NotebookLM, Claude.

CERTIFICATIONS (Aligned to Career Growth- In Progress)

- Microsoft Certifications :
  1. MOS : PowerPoint Associate (MO-310) – AI for Techies
  2. MOS : Excel Expert (MO-211) – AI for Techies
  3. Microsoft : Power BI Data Analyst Associate (PL-300) – AI for Techies

- Ongoing Training :
  - Python for AI & Automation – AI for Techies
  - AI & Machine Learning Mastery – AI for Techies
  - Generative AI & Prompt Engineering – AI for Techies
  - AI tools & Automation – Be10x
  - Advanced Data Analytics & AI – Be10x
  - IT Service Management (ITIL) – Officemaster
  - Automation & Digital Transformation - Officemaster

EDUCATIONAL QUALIFICATIONS

- BE in Computer Engineering with Distinction from Pune University
- Diploma passed from MSBTE with Distinction.
- 10th passed from Maharashtra State Board with Distinction.

PREVIOUS EMPLOYMENT

- **Organization : - <u>IBM India Pvt. Ltd.</u>** (Pune).
- **Designation : - Support Engineer**
- **Duration : - August 2024 to November 2024.**

Project Details :

Project Name: DXL (Digital Experience Layer)
➢ **Functional & Process Knowledge tools** – SQL Developer, Unix, Ticketing BMC Remedy Tool, Putty, RDP Server. ➢ **Project Description** : DXL is a backend middleware platform that connects multiple customer-facing channels such as the VI App, Web Portal, and Retail POS systems with the Source of Record (SOR) applications like billing, CRM, and product systems. The application flow starts when a user initiates a request from any VI channel — for example, recharge, payment, or product inquiry. The request is received by DXL through REST APIs, where it undergoes validation, business logic processing, and orchestration across multiple backend SOR systems. DXL also manages payment processing by integrating with payment gateways and ensures transaction data persistence in MongoDB, which acts as the primary database.

- **<u>Major Job Responsibilities:-</u>**

- Provided L2 Production Support for CRM-based telecom activation workflows.
- Monitored system health and API performance
- Reduced incident resolution time by 25% via structured RCA
- Worked closely with development and infrastructure teams for permanent fixes, and contribute to deployment validation.
- Problem determination and resolution within agreed SLA.
- Managed critical incidents within SLA timelines

- **Organization : - <u>JIO Platforms Limited</u>** (RCP Mumbai).
- **Designation : - Deputy Manager**
- **Duration : - May 2022 to July 2024.**

Project Details :

Project Name: Enterprise SAP CRM
➢ **Functional & Process Knowledge tools** – SAP, SQL Developer, Unix, Ticketing HPSM Tool, RDP Server. ➢ **Project Description**: For any JIO postpaid number activation, all request routed through Enterprise CRM for Validations like GST number, customer type, company POA/POI, all the address proof. Once all are validated then postpaid number will be activated through CRM. Termination & Suspension feature also available for postpaid numbers in CRM. Multiple type of CAF's are receiving for activations like IOT, Mobility, Jio_Link, ODCPE.

- **<u>Major Job Responsibilities:-</u>**

- Provided L2 Production Support for CRM-based telecom activation workflows.
- Monitored system queues and logs ensuring 99.9% uptime
- Reduced incident resolution time by 25% via structured RCA
- Executed Linux-based system backups and validations.
- Problem determination and resolution within agreed SLA.
- Managed critical incidents within SLA timelines
- Implemented configuration and security changes
- Ensured SLA adherence and minimized downtime.

KEY ACHIEVEMENT

Improved system stability and reduced recurring incidents through proactive monitoring practices.

- **Organization : - <u>IBM India Pvt. Ltd.</u>** (Pune).
- **Designation : - Application Support Engineer**
- **Duration : - Mar 2017 to May 2022.**

Project Details :

➢ **Project Name: VI Second Consent Gateway Application**
➢ **Client: VI India.** ➢ **Functional & Process Knowledge tools** – SQL Developer, Unix, Ticketing BMC Tool, Putty, RDP Server. ➢ **Project Description**: Telecom Regulatory Authority of India (TRAI) has come up with a common activation process for VAS.As per this process, all operators will set up a Consent Gateway (CG) which will be managed by a third party. This 3rd party will not have any vested interest in VAS services or content and will be contractually obligated to be responsible for taking the 2nd consent needed for activation of any Value-added service (VAS). ➢ All subscription VAS services that are promoted via Voice (IVR, OBD, and IBD), USSD, SMS, Flash and WAP will be processed for activation only after 2nd consent has been taken. VAS activation will reach on VAS platforms seeking first confirmation and seamlessly patched to CG for second confirmation. After getting the second confirmation, seamlessly patch the session to subscription engine (MSG) for VAS service charging & activation. Also it is extended to PPU (Pay Per Usage), STK (SIM Tool Kit) services.

➢ **Project Name: OFFNET**
➢ **Client: VI India.** ➢ **Project Description**: Offnet is PAN India centralized system for PPU (Pay Per Usage) charging API used for event based charging. ➢ It supports Refund in case of customer disputes or failed cases. ➢ It supports subscriber blacklisting feature. ➢ Credit limit check feature availability for Post-paid subscriber.

➢ **Major Job Responsibilities: -**

- Driven Project for VAS and IT system consolidations for erstwhile Vodafone and erstwhile Idea.
- Involved in launching of new brand V! wrt VAS and Digital platforms of VIL system.
- Responsible to make VAS and IT system compliance as per IBM guidelines.
- Supported event-based charging APIs (PPU) and refund systems.
- Managed production escalations across IT, Marketing & Business teams.
- Played key role in Vodafone-Idea system consolidation.
- Responsible to configuration of new services, short code and verbiage changes for VIL Vendors.
- Ensured SLA adherence and minimized downtime.

KEY ACHIEVEMENT :

- Successfully supported high-volume telecom platforms serving millions of subscribers.

.

PERSONAL DETAILS

- Name : Anand Chavan
- Father's Name : Gopal Chavan
- Date of Birth : 30th Apr-1992
- Marital Status : Unmarried.

- Date:
- Place: Pune (Anand Chavan)
